Do Not Write Below this line *(Reserved for Reviewer Comments)*:

Abstract (one page)

What is it you want to do? Which Cores will you need to use and why? How does this project fit in with your long-term scientific/career goals?

(Please note: this page will be available on the web if this project gets funded)

Budget (one page):

Estimate the costs of each Core's usage needed to carry out the research design. Ask your local sponsor for their signature attesting to their agreement to conduct this research in their Core facility. Please provide a Letter of Support from the host/partner Core Director (at the end of the application) attesting to their willingness to provide the reagents or services AND that it can be provided for \$10,000 or less.

Applicant Signature:

Sponsor Signature:

Research Design and Methods (one page):

Describe the methods you will use to accomplish **one specific aim**. This description must include a justification and rationale for the use of another Center's Core.

Other components

Literature cited (no more than one page), explanation of the use of Human Subjects and/or Vertebrate Animals, applicant's signature and agreement to publish the abstract page should the P&F project get funded.

I agree that the Abstract may be posted online if this Partner P&F project is awarded.

Applicant Signature:

Biosketch (2-3 pages)

Required components: Education/Training of Applicant, Personal Statement, Positions/Employment and Honors, Contributions to Science. A suggested format is the NIH Biosketch format ([NIHformat](#)).
