

Featured Speakers

Presidential Symposium Speakers

Fred H. Gage

Salk Institute for Biological Sciences, USA

Jüergen Knoblich

IMBA - Institute of Molecular Biotechnology, Austria

Shinya Yamanaka

Center for iPS Cell Research & Application, Japan

Anne McLaren Memorial Lecture

Jeannie Lee

Massachusetts General Hospital, USA

Ernest McCulloch Memorial Lecture

Hiromitsu Nakauchi

University of Tokyo, Japan

Keynote Speaker

Robert Langer

Massachusetts Institute of Technology, USA

ISSCR 2015

ANNUAL MEETING

STOCKHOLM | SWEDEN

24-27 JUNE

Stockholmsmässan

Be a part of the scientific program that explores the breadth of stem cell research and applications.

Session topics include

- Disease Modeling
- Epigenetics and Pluripotency
- Immunology and Stem Cells
- Making Tissues and Organs
- Pluripotency, Mechanisms of Reprogramming
- Regeneration and Engraftment
- Therapy with Stem Cells

About Stockholm

- Easy transportation
- 800 years of history
- The Green Capital of Europe
- Beautifully located at the Baltic Sea; the "Venice of the North"

An Unveiling of

STEM CELL INNOVATION

Networking Opportunities

- Connect with all spectrums of study at lively poster receptions.
- Organize or attend topic-focused Meet Up sessions.
- Map your career at early career events.
- Explore the largest exhibit hall dedicated to stem cell research; uncover the newest tools and reagents to accelerate your research.

"My research changes every year as a result of new discoveries I hear at the ISSCR Annual Meeting."

For instance, I remember when Rudolph Jaenisch revealed his work generating isogenic pairs of human iPS cells in a line in which the gene had been repaired. With this discovery, my lab has been able to better understand the molecular mechanism underlying a congenital form of heart disease."

Christine Mummery

Leiden University Medical Center, Netherlands
